First - some history:

The Jaguar Mark 10 4.2 saloon that was to named "Prince Caspian" was produced by the factory on 5th November 1965, so it is now officially 50 years old! I've received a Production Record Trace Certificate from the Jaguar Heritage Trust that confirms the car still has all its original components - engine, gearbox etc. It was dispatched to Bryson Australia in Melbourne on 25th November 1965, but it seems the car hung around in their showrooms for a couple of years, and it was not registered to its first owner until 9th November 1967.

JAGUAR		-
HERITAGE TRUST		
Production Recor	rd Trace Certificate number 43879	
Prepared for	Nigel Miller	
그 그는 동안은 귀엽을 가지 않는 것이 같은 것이 같은 것이 같은 것이 같이 없다.	given below are a true copy of an entry in the original factory h the chassis number quoted:	
Make and model	Jaguar Mark X 4.2 litre	
Body style	Saloon, right-hand drive	
Date of manufacture	5 November 1965	
Chassis number	1D 52065 BW	
Engine number	7D 53251-8	
Body number	4D 53175	
Gearbox number	13526	
Transmission	Automatic	
Exterior paint colour	Warwick Grey	
Interior trim colour	Maroon	
Hood (soft top) colour	Not applicable	
Original distributor	Bryson, Australia	
Original dealer	Not recorded	
Date of dispatch	25 November 1965	
First owner	Not recorded	
Registration mark	Not recorded	
Remarks	Junner	
This certificate was issued Mary O'Rourke – Jaguar F	by the JDHT on 2 October 2015 Heritage Archive	k

I wonder what Tony Ireland would have to say if his salesmen couldn't move one of his new cars for 23 months?

The distributing dealer, Bryson Industries Ltd, doesn't seem to exist any more. The owner Jack Bryson was reportedly a personal friend of Sir William Lyons, and his son Hugh (22) was killed in 1966 while driving/racing(?) a Mark II.

I imagine a fair number of the older Jaguars in our club will have been supplied through Brysons.

I managed to get, on e-Bay, this booklet published by Bryson, called "The Jaguar Story".

Now, back to my project..... Where was I? Oh yes:

Heater

The heater box has now been rebuilt and re-fitted to the bulkhead, after some serious cleaning! The insulating covers look their age and may need replacing soon, but where do you stop?

The finished heater box ready for refitting.

Just to remind you (and me!) what it looked like to start with.

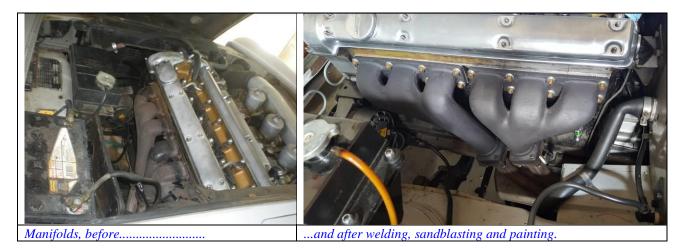

All this rust and muck proved to be from the box itself, and not in the bulkhead, which cleaned up well.

The finished heater assembly - waiting for the first snows in Townsville......

Engine

Nothing much to report, except cleaning and polishing.

Bodywork

The rubber kit, or at least most of it, has arrived, but it took several emails to fully understand what had been sent, and where it goes. Nothing has been fitted yet, but I certainly need the windscreen and rear window replaced for the roadworthy. I've removed the rear window - fitting will wait until both can be fitted together.

All the road wheels have been removed, tyres jettisoned, rims straightened by Jordan at Mag-Medic, and sent to Zapps for powder-coating. Sourcing the correct whitewall tyre in 205 75R14 has been a mission, but with the help of Grant at Bob Jane T-Marts, I now have a choice of MAXXIS or BRIDGESTONE (for \$50 extra per tyre). Whichever one I choose - and I must control the expenses where possible - the new roadwheels will look magnificent.

I took off the rear bumper for cleaning, and to remove the unsightly and very heavy towbar. The paintwork behind the bumper was quite shabby, but looked like new after some cutting and polishing.

Upholstery

The rear seats have now been finished, and look spectacular. They do not look "brand new" as they retain a delightful patina of age.

I've dismantled the leatherwork for the front seats to use the reject panes as templates for the new leather, vinyl and material pieces.

The back seats have been repaired "sensitively". "Caspian" should not masquerade as a new car, but rather will gracefully show his age.

Rear suspension (IRS)

The IRS sub-frame has been removed, but not without some drama. The exhaust system has been welded together rather than using clamps, so separating it required some cutting.

The whole IRS unit is very dirty, and will require severe cleaning and dismantling before any rebuilding can take place.

When I looked at the unit, I couldn't help but think "Nigel, you fool!! What have you done?......"

Jaguar allowed 45 minutes for removal of the IRS subframe. It took me the better part of 2 days to get to this stage!!! The unit is very heavy, and manoeuvring it around the

The unit is very heavy, and manoeuvring it around the limited space in my shed is a challenge.

The brake calipers and rotors have been removed and sent out to Brakeforce for reconditioning.

I can see a wire brush and breathing mask in my future.....

Have a great Christmas and New Year, and make sure you leave time to enjoy your Jags!
